RDS Services, LLC is that specialized!

Retiree Drug Subsidy reopening and administration is the only Medicare and Medicaid Services program area that we operate within all year long.

Unlike the few other companies that offer to provide reopening services as a side line, RDS Services, LLC only works within the Retiree Drug Subsidy program from the date the law was passed in 2003.

As noted in the “**RDS Process**” document, we have developed proprietary systems and software that are unmatched in their capabilities to **uncover and recover** the subsidy dollars you are due from the program.

Administering a Retiree Drug Subsidy program is a complex and highly administrative activity that can consume valuable time and resources. RDS Services, LLC will do all the work for you. There is no requirement for your staff to be tied up in the reopening process. Just leave it to us and we will do all the work!

Our team of specialists at RDS Services, LLC understands the intricacies of Center for Medicare and Medicaid Services compliance requirements ‘allowing us to uncover and recover the maximum amount of subsidy a plan sponsor is eligible for from the program.

As Retiree Drug Subsidy Specialist, we provide Full-Service RDS Program Support

RDS Services, LLC offers a full suite of RDS program services, including the following:

- Original application and reconciliation management
- Ongoing RDS program management
- Data aggregation services

We know and understand the ins and outs of the RDS program, ensuring that you collect 100% of your eligible drug subsidy dollars.

RDS Application and Reconciliation Management

When you engage with us, our team of experts will become the designated Vendor, Cost Reporter Designee, and Account Manager on all RDS applications. We'll work with you to establish efficient procedures for maintaining and updating retiree lists.

Ongoing Services

Once an RDS application is submitted to the CMS, there are ongoing activities that need to be managed to ensure program compliance. In addition to our RDS application management services, we offer RDS administration services—with and without data aggregation services.

RDS Administration Services

RDS Services, LLC offers the following RDS administrative services, including:

Data Aggregation Services

In addition to the ongoing administrative services, RDS Services, LLC has created a unique and proprietary tool that allows us to efficiently aggregate very complicated data sets of multi-year membership and drug claims. The ability to review and understand the entire population of data allows transparency and oversight that can greatly improve program outcomes.

To find out more about how we can maximize your subsidy program, please call our National Sales Director at 516-361-9404.

Sincerely,

George Fox, LUTCF
